DOC2DATA.AI

Empowering Government Digital Revolution with Innovative **Document Processing**

Embracing digital transformation through document digitization can be challenging to government agencies for a number of reasons. With Doc2Data.ai government agencies can overcome these challenges in an instant, making it quick and easy to embrace digital transformation.

Solving Digitization Challenges

Digitizing Complex Documents With Multiple Formats And Layouts

Detecting Anomalies Within Documents

Personally Identifiable Information (PII) Identification And Redaction

Metadata Tagging Using Keyword Identification

Document Search On Steroids For Faster Information Search

Quality Checks Of Document Text With Machine Learning

Automated Compliance Processing (NARA, FADGI, HIPAA, 508)

Integration With Existing Document Management Systems

Intelligent Character Recognition For High Volume Document Processing

EIGENNET

Our Solution: Doc2Data.ai

Doc2Data.ai is an innovative, fast, and cost-effective tool that leverages AI and Machine Learning to offer a solution that processes and digitizes a variety of fragile and non-fragile documents that come in varying sizes, formats, and legibility.

What type of work does Doc2Data.ai do?

Management and tracking of records for federal retention through metadata tagging and indexing consistent with **OMB Circular** regulations, **Federal Records Act** etc.

Identifying, retrieving, and processing documents for **FOIA Requests, HIPAA Access Requests** etc. through document processing and **Boolean based power search.**

Document backlog reduction by bulk processing documents of varying size, type, and complexity with **data and metadata extraction** for efficient processing.

Assist in paralegal document processing by using Doc2Data.ai's **automated compliance checks**, easier search and retrieval and metadata tagging for compliance and guidelines.

Ensure document compliance with **FADGI standards** for cultural and heritage agencies dealing with historical records, photographs, and archival records.

Transfer documents to National Archives ensuring proper digitization and compliance per **M-23-07 and NARA** regulations.

With Doc2Data.ai and its features, government agencies can embrace an efficient era of document digitization, reducing resource intensity and enhancing productivity. It is customizable and tailored to meet agency needs, propelling government agencies towards an agile future in document processing.
